Email: nirajkumargupta2642006@gmail.com
Mobile: +91 9709802096

SKILLS

Languages:	C++, JavaScript
Frameworks:	HTML, CSS, React.js, Next.js, Node.js, Express.js
Databases/ORM:	PostgreSQL, MongoDB, Prisma
Tools:	Git, GitHub, Postman, Docker
Soft Skills:	Problem-Solving, Leadership, Team Collaboration

PROJECTS

Real-Time Developer Network | [GitHub](#) | [Live Link](#)

May' 26

- Engineered a high-performance developer networking platform with a Tinder-style discovery feed and bidirectional connection system.
- Built a real-time chat system using Socket.io with optimistic UI updates, using cursor-based pagination and reverse infinite scrolling for efficient message loading.
- Designed scalable security and media pipelines with direct-to-cloud uploads using Cloudinary, Redis-backed rate limiting, OTP-based authentication, and OAuth 2.0 authentication (Google/GitHub)
- Tech Stack: React.js, Node.js, MongoDB, Cloudinary, Socket.io

Collaborative Whiteboard | [GitHub](#)

Feb' 26

- Developed a real-time collaborative whiteboard enabling multiple users to draw simultaneously on a shared canvas using WebSockets for low-latency synchronization.
- Implemented interactive drawing tools (freehand, shapes, text, eraser, canvas reset) with seamless live updates across clients and maintaining a consistent shared state.
- Designed a scalable room-based architecture and structured the project as a Turborepo monorepo, improving session isolation, code reusability, and development efficiency.
- Tech Stack: Next.js, Node.js, Express.js, PostgreSQL, Prisma, Turborepo

Coupon Management System | [GitHub](#) | [Live Link](#)

Dec' 25

- Built a web application for managing and tracking digital coupons, featuring secure authentication, categorization, searching, filtering, and lifecycle management.
- Engineered a modular RESTful backend with centralized error handling and optimized MongoDB queries using indexing and aggregation pipelines for high-performance data retrieval.
- Developed a cron-based background service with Nodemailer to automatically send coupon expiration alerts, reducing missed coupon usage through timely reminders.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Nodemailer

TRAINING

W3Grads (Edtech Company)

Jun' 25 - Jul' 25

- MERN with Generative AI Integration
- Built an AI-driven Notes Management System with automated summarization and lifecycle management.
 - Followed Agile development practices with Git-based version control while maintaining clean, modular code.

CERTIFICATES

- | | |
|---|---------|
| MERN Stack with Generative AI W3Grads | Aug' 25 |
| Cloud Computing NPTEL | May' 25 |

ACHIEVEMENTS

- | | |
|--|---------|
| Secured 1 st place among 10 teams at the INTEGRTR Hackathon | Jun' 26 |
| Solved 800+ DSA problems across different platforms. | May' 26 |
| Awarded Certificate of Volunteering and Community Service by an NGO. | Jun' 24 |

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering CGPA – 8.6	Aug' 23 – Present
Bindeshwar Singh College	Patna, Bihar
Intermediate Percentage – 74	Apr' 21 – Mar' 23
Camford Public School	Patna, Bihar
Matriculate Percentage – 70	Apr' 20 – Mar' 21
